

Privacy Policy

Version 1.0 | Effective: June 2026 | Pilot Release

EU AI ACT — ARTICLE 50 DISCLOSURE

AMENTA is an AI-powered system. When you interact with AMENTA you are communicating with an artificial intelligence assistant, not a human. AI-generated content reflects probabilistic outputs and may contain inaccuracies. You should exercise your own judgment before acting on any recommendation.

1. Who We Are

AMENTA is an AI food guide and lifestyle concierge currently in early pilot testing. This policy explains what personal data we collect, why we collect it, how it is stored, and your rights under the General Data Protection Regulation (GDPR) and applicable Dutch law. For data-related queries, contact: hello@amenta.app

2. Data We Collect

During the pilot we collect the following categories of personal data:

- **Email address** — used to authenticate your account and send service communications.
- **Location data** — your city or coordinates, shared when you ask for nearby recommendations. We do not track your location continuously.
- **Chat history** — the messages you send to AMENTA and the responses you receive, stored to provide session continuity and improve the service.
- **Preferences and memory** — dietary preferences, cuisine interests, and other details you share that help AMENTA personalise responses over time.

We do not collect payment data, government identification, or special-category personal data.

3. Legal Basis for Processing

- **Contract performance** — processing your email and session data to provide the service you requested.
- **Legitimate interests** — improving service quality during the pilot period, subject to your rights.
- **Consent** — for optional processing such as using your chat data to refine AI outputs. You may withdraw consent at any time.

4. How Data Is Stored

- **Supabase (EU region)** — your session data, chat history, and preferences are stored in a PostgreSQL database hosted within the European Union.
- **Railway** — our application server, which processes requests and holds configuration. Railway does not independently persist your personal data.

Data in transit is encrypted via TLS. Data at rest is encrypted by our hosting providers.

5. Third-Party Services

We share limited data with the following processors to operate AMENTA:

- **Anthropic** — your chat messages are sent to Anthropic's API for AI processing. We do not send your email address or account details to Anthropic.
- **Google (Maps, Places, Geocoding APIs)** — location queries are sent to Google to retrieve venue information and map data.
- **Resend** — transactional email delivery (account invitations, notifications).

We do not sell your data to third parties and we do not use it for advertising.

6. Data Retention

- Your data is retained for the duration of the pilot unless you request deletion earlier.
- Pilot data will be reviewed at the **two-month mark** to assess service quality and inform product decisions.
- Following the pilot period, retention schedules will be updated and communicated to users.
- On deletion request, your account and associated data are permanently removed within 30 days.

7. Your Rights (GDPR)

As a user based in the EU/EEA you have the right to:

- **Access** — request a copy of the data we hold about you.
- **Rectification** — ask us to correct inaccurate data.
- **Erasure** — request deletion of your personal data.
- **Restriction** — ask us to limit how we process your data.
- **Portability** — receive your data in a structured, machine-readable format.
- **Object** — object to processing based on legitimate interests.
- **Withdraw consent** — at any time, without affecting prior processing.

To exercise any of these rights, send an email to hello@amenta.app with the subject line *Data Request*. We will respond within 30 days. You also have the right to lodge a complaint with the Dutch Data Protection Authority (Autoriteit Persoonsgegevens) at www.autoriteitpersoonsgegevens.nl.

8. Pilot-Specific Notice

- AMENTA is in an early testing phase. Your interactions may be reviewed by the AMENTA team to evaluate and improve the product.
- Features and data practices may change; updates will be communicated via email.
- Access is invite-only and may be withdrawn at any time.

9. AI System Disclosure

AMENTA uses a large language model (Claude, by Anthropic) to generate food and lifestyle recommendations. This means:

- Responses are generated by an AI, not a human.
- Outputs may contain errors, outdated information, or culturally insensitive content.
- AMENTA's recommendations are not professional dietary, medical, or legal advice.
- Users should verify critical information independently before acting on it.

10. Cookies

AMENTA uses session-scoped storage (not third-party tracking cookies) to maintain your login state. No advertising or analytics cookies are used.

11. Changes to This Policy

We may update this policy as the product evolves. Material changes will be communicated by email at least 14 days in advance. The version number and effective date at the top of this page will reflect the latest revision.
